

FRIDAY ENVIRONMENT FORUM

NPA Environment Centre

26 May

Great Barrier Reef

This week – May 26 - Noosa Parks Association welcomes **Gary Cranitch**, Queensland Museum photographer of 34 years to Friday Environment Forum on May 26.

The Great Barrier Reef: A Queensland Museum Discovery Guide'

Gary has spent his lifetime chasing images of Queensland's unique biodiversity and landscapes and been actively involved in the Museum's extensive publications program since the early '90's. This includes Wildlife of Greater Brisbane, Wild Guide to Moreton Bay, Discovery Guide to Outback Queensland to name a few.

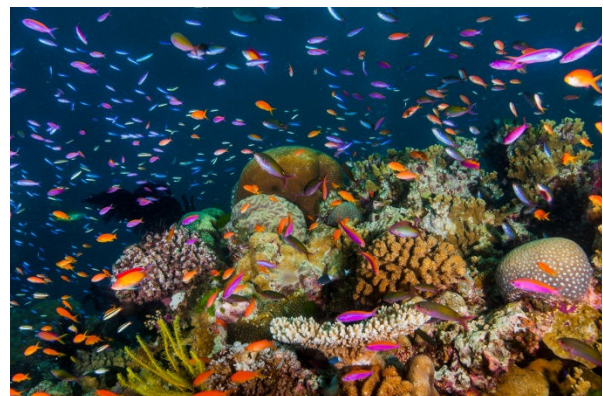

The most recent publication and by far Gary's most challenging assignment to date is 'The Great Barrier Reef: A Queensland Museum Discovery Guide'. The net result is the definitive guide to this world famous icon.

Come along on Friday morning to join Mr Cranitch as he takes us on an underwater journey through this remarkable World Heritage listed location.

Gary will discuss everything from equipment, diving and sharks, through to crown- of- thorns starfish and coral bleaching.

Join the audience on **Friday May 26** at the Environment Centre, 5 Wallace Drive, Noosaville to learn more about the Great Barrier Reef. The forum starts at 10.30am and ends 12:15pm. For those interested in an interpretive birding walk before the forum, meet Valda in the Environment Centre car park at 8.30am.

All welcome.

Underwater on the Great Barrier Reef
