

FRIDAY ENVIRONMENT FORUM

NPA Environment Centre

Highlights of 2017

Family of White Bellied Sea Eagles

Bird Observers talks are always popular. *Australian Raptors* by Greg Czechura from Q'ld museum in February 2017 was an excellent example.

Christopher Clemente intrigued the audience with his amazing talk on *Incredible Insects* such as these weight-lifting ants

Sir Thomas Hiley Information Centre at Kinaba

On November 10, Ada Medak explained how Friends of Kinaba are restoring local history.

Gary Cranitch, Queensland Museum photographer showed us that there are still delights on the Great Barrier Reef on May 26

Cecily Fearnley continued to entertain and educate with her Christmas Island travels

One of the biggest audiences of the year enjoyed Adrian McCallum's tales of his *Polar Adventures* on July 21.

Come along to the **Noosa Parks Association Environment Centre** at Wallace Drive Noosaville on Friday mornings to learn more about our extraordinary environment. **Everyone is welcome. Forums re-start on Feb 2, 2018.**

New audio-visual equipment was installed in November. With the ceiling mounted projector 70 people can be comfortably seated and the viewing conditions are such that those in the "overflow" outside at the back can see the screen and the speaker easily under the improved conditions. Join the audience in 2018 to see for yourself.
