

# **FRIDAY ENVIRONMENT FORUM**

## **NPA Environment Centre**

### **6 April 2018**

### **Weird and Wonderful Wildlife**

Many visitors of the furry or feathered variety will be special guests at Noosa Parks Association's Friday Environment Forum on April 6. Martin Fingland of Geckoes Wildlife will be on hand to introduce his furry friends and tell the audience all about them when he presents "Weird and Wonderful Wildlife". This is a special 'school holidays' forum designed to give children and their parents and carers a hands on experience with some common and not so common Australian animals.

Geckoes Wildlife have an amazing collection of critters after many years of experience in wildlife education. They are also committed to the conservation of rare, threatened and endangered species. Is a Tawny Frogmouth a frog? What exactly is a Dunnart? You'll find the answers to these questions and be able to ask your own whilst learning new and interesting facts about the creatures that sometimes inhabit your own backyard.

All are invited to join this special Friday Environment Forum for the young and the young at heart.

The forum commences at 10.30am and will be held at **Noosa Parks Association's Environment Centre** at **5 Wallace Drive** Noosaville, right behind the Noosa Library. Coffee will be available from 10am.

Children and parents are also invited to join Valda and the Bird Observers group by meeting in the car park at 8.30am. Bring your binoculars and a hat to enjoy the birds of Wallace Park before the forum begins. All are welcome.
