## **Use and stewardship of public land in Noosa**

Noosa Council controls community land on behalf of its residents. Some of that land is Council owned and some is owned by the State with Council managing the use under a trustee arrangement.

Council is under constant pressure to allow permits for a wide range of activities on community land. That land ranges from beaches and parks to sporting fields and roads. The activities proposed can be private functions, community events, large and small tourism events, weddings, markets, and all manner of business endeavours.

*Mayor, Tony Wellington*

**As the use of community land has become a hot topic of late, Noosa Parks Association has invited Mayor Tony Wellington to explain Council's approach to this vexed issue.**

Just how Council navigates this complex topic will be the subject of a presentation to Friday Environment Forum on March 9th when Mayor Wellington will be accompanied by senior Property Manager for Noosa Council, Clint Irwin.

This will be an opportunity for residents to get a clearer picture about Council's role in ensuring that public land is utilised in the best interests of the community.

Join in this discussion at the **NPA Environment Centre, 5 Wallace Drive, Noosaville** on Friday morning at **10.30am**. Coffee and chat from 10am. The forum will conclude at 12.15pm. All are welcome.

You are invited to join the Interpretive Birding group for a wander in Wallace Park. Meet in the car park at 8.30am.
